COMMUNICATION PLAN

COMMUNICATION PLAN MATRIX:

Effective interaction strategies safeguard progress transparency. This document registers communication routing, channel tool specifications, frequencies, and target participant groups mapped throughout your development cycles.

OPERATIONAL COMMUNICATION STRUCTURE

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Discord / Slack	Core Developers	Track module assembly logs, resolve local path boundaries, and coordinate daily features.
2	Progress Update	Weekly	GitHub Project Board	Full Project Team	Verify sprint metrics, tally feature task points, and update release notes.
3	Issue / Bug Discussion	As Needed	GitHub Issues	Submodule Owners	Debug local signal parameters, resolve database validation bugs, and fix model timeouts.
4	Stakeholder Review	Bi-Weekly	Google Meet	Mentors & Team Leaders	Demonstrate user panel flows, review machine learning evaluation metrics, and gather feedback.
5	Final Demo Rehearsal	Once	Microsoft Teams	All Project Affiliates	Execute full pipeline testing from voice capture uploads to PDF sheet compilation.

COMMUNICATION CHALLENGES & RESOLUTIONS

S.No	Challenge Faced	Resolution / Action Taken
1	Asynchronous coordinate limits and model checkpoint version updates syncing delays among developers.	Established modular workspace directories coupled with explicit schema documentation parameters inside the core repository.
2	Tracing nested configuration bugs during local machine learning evaluation runtime pipeline crashes.	Centralized environmental tracking parameters into unified file structures and utilized structured GitHub Issue threads for traceability.
